**Payroll Management Module contains following module :**

**Employee Profile Module**

At the time of employment an employee profile is generated in which all relevant data regarding the employee is captured. At this time the user is given the option to either enter the details of remuneration and deductions manually or through a group/grade/scale system. The software permits the user to dynamically generate grades/scales for paying the employees. Similarly the user can generate separate grades/scales of deductions. The most time consuming task of entering the pay details of an employee is thus reduced to the touch of a button. Gathered information of the employee and allow the user to make changes in the allowances and deductions (already assigned to the employee) for that particular month as per the requirements. After this the Gross Salary is calculated automatically for that month. The 12th month pay slip serves as the yearly statement of accounts and can be used as a certificate of income for the Income Tax purposes.

### **Pay-Slip Generation**

The Monthly Pay-slips are divided into two parts; the emoluments and deductions for the current month and the same for the year to date.

### **Loan Application Module**

When the employee applies for a particular loan, those details are entered in the "Loan Application form" where it automatically calculates the MONTHLY INSTALLMENT on the basis of the loan amount, interest rate, and the Loan period.

### **Reports**

The Payroll Software can generate different reports as per the user requirements. The three groups that cover these reports are Employee Reports, Pay related Reports, General Reports.

### **College Accounting Module contains following module :**

- Fees management module.
- Payments from UPTU University.
- Payment received from U.P.T.U.
